Re: Approval of Plan for Future Use
Inventory No.: OS0802
Well No.: 1A
Location: NE/4, Sec. 1, T 21N, R 7E
Osage County, Oklahoma

Dear Mr. Garbacz:

By this letter we approve your January 11, 2012, plan for future use of the referenced injection well and extend its plugging deadline to June 19, 2017. This plugging deadline does not apply if you activate the well for injection or convert it to production use before that date. An earlier plugging date may be specified by this office or the Bureau of Indian Affairs, Osage Agency if continued temporary abandonment constitutes a threat of contamination of drinking water sources or you no longer have a future use of the well. We may extend the plugging deadline if the well continues to have mechanical integrity. During the temporary abandonment period you must continue to comply with applicable Osage Underground Injection Control program requirements.

The referenced injection well has mechanical integrity. This is sufficient to assure that fluids will not move through the well into underground sources of drinking water during the temporary abandonment period. If the well loses mechanical integrity, we may modify monitoring requirements to assure protection of drinking water sources.

Please contact Mr. Ronald Van Wyk at 214-665-6459 if you have any questions.

Sincerely yours,

Jerry Saunders
